

7.2.2

TIMMS ERP

Power to grow your business

Disprax develops and distributes the Total Industry Management and Marketing System (TIMMS) which is a comprehensive and integrated suite of computer accounting and inventory control software.

★★★★★ - Rated by Clients

Modules for Every Stage of Your Growth

With a unique modular design, you can select the best TIMMS configuration for your business. This flexibility allows the system to be expanded as your business requirements grow and change.

In the back end, we have the option to modify and customise the system's workflow to suit your business needs.

Solutions for Every Need

TIMMS ONSITE The Enterprise Solution

TIMMS ONSITE solution provides your business with all the benefits of running your own servers. It is easy to upgrade, modify and backup all from one central location.

Recommended for businesses with 5 or more users.

TIMMS HOSTED The SMEs Solution

TIMMS HOSTED gives you the full functionality of TIMMS ONSITE with lower set up costs, faster implementation and excellent reliability. And these are just a few of the benefits.

Recommended for businesses with less than 5 users.

Why Choose TIMMS

- While the TIMMS software suite offers you a complete solution to run your business, there are also many other reasons to choose TIMMS.
- TIMMS software is developed in-house and on-site. The Disprax development team are on hand to modify and improve TIMMS based on your requests and needs.
- FREE Upgrades and Enhancements are made available twice a year and you can have your input into user voted enhancements!
- Unlimited access to a dedicated Support Team, onsite every working day of the calendar year (excluding national public holidays).
- The TIMMS system is a very stable & flexible software package that runs in both Linux and Unix servers.
- Disprax offers many consultancy services for system administration work that may need to be carried out. We also work closely with a Unix strategic partner, with representatives around Australia, that would be available to support your business.
- End-to-End solutions provide all the relevant products, services and support your business needs to run smoothly – so you only need one company that can implement and integrate your IT business infrastructure.
